

APEX ASSET MANAGEMENT LIMITED

Senior Data Analyst - Case Study

COMPANY OVERVIEW

- Apex Asset Management Limited operates 4 Mutual Funds with SIP (monthly investment) and Non-SIP (one-time lump sum) modalities. The company has a Retail Sales Team of 16 RMs. Strategic focus is on SIP for sustainable AUM growth.

YOUR ROLE

- Analyze business performance, identify weakness areas, understand client patterns, and assess RM productivity. Provide actionable insights and recommendations.

DATASETS

- Apex_Core_Database: Master File (account details, RM info, fund assignments, status) + RM List
- Apex_Transaction_Ledger: All transactions (Purchases, Surrenders, Dividends)

SECTION 1: FUND PERFORMANCE ANALYSIS

Context: For Apex, funds are the core products, and therefore understanding how each fund is performing is key to business health. The data provided for this section allows computing relevant metrics around size, leakage, cash flows, and customer engagement trends. Perform a detailed analysis to answer the following questions.

1. How would you rank the funds in terms of their performance? Hint: Analyze account growth, trend in account sizes, churn, among others.
2. Based on your analysis, what recommendations can you come up with for each fund?

Key Formulas:

- Discontinuation Rate = Discontinued Accounts / Total Active Accounts
- Closure Rate = Closed Accounts / Total Active Accounts
- Net Flow = Total Purchases - Total Surrenders
- Develop additional metrics as needed to support your analysis.

SECTION 2: CUSTOMER ACQUISITION & DEMOGRAPHICS

Context: Understanding customer acquisition trends, demographic patterns are critical for identifying natural customer segmentation, growth and retention strategies, and up/cross-selling opportunities. Analyze the provided data to answer the following questions.

1. Which segments should each fund focus on? Hint: You can use customer demography, financial profile (installment size), and any combination as base for finding clusters.
2. Are there quantifiable cross-selling opportunities?

Key Formulas:

- Unique Customer Identifier = Mobile phone number
- Retention Rate = Active Clients / Total Clients Onboarded
- Churn Rate = (Closed + Discontinued) / Total Clients
- Develop additional metrics as needed to support your analysis.

SECTION 3: RM PERFORMANCE & PRODUCTIVITY

Context: Relationship Managers (RMs) play a critical role in customer acquisition, portfolio growth, retention, and long-term value creation. Understanding RM productivity, specialization, quality of acquisition, and growth trajectories is essential for optimizing sales strategies, resource allocation, recognition programs, and capability development. Analyze the provided data to answer the following questions.

1. How do RMs compare in terms of portfolio size, fund specialization, and value creation? Hint: analyze unique clients onboarded, average installment size, growth trends, high-volume vs. high-value producers.
2. How the Retails Sales Team Performed over the years and what actions should management take to improve team performance?

Key Formulas:

- 1-Year Retention Rate as of May 2025 = Accounts Active as of May 2025 who were onboarded in May 2024 / Accounts onboarded in May 2024
- Net Flow = Total Purchase Value - Total Surrender Value
- Develop additional metrics as needed to support your analysis.

CASE DELIVERABLES

- Python notebook containing your approach, analysis, answers and recommendations.
- Presentation slides (max 10 slides) summarizing key findings and recommendations

EVALUATION CRITERIA

Each submission will be evaluated on 3 dimensions:

1. ANALYTICAL DEPTH

- Thoroughness in addressing all questions in Sections 1-3
- Quality of insights beyond basic answers
- Appropriate analytical methods and statistical rigor

2. BUSINESS INSIGHT & RECOMMENDATIONS

- Quality and depth of insights derived from data
- Actionability and specificity of recommendations
- Strategic implications clearly articulated

3. COMMUNICATION & PRESENTATION

- Clarity of writing and professional language
- Professional formatting and presentation
- Ability to tell a coherent business story with data

SELECTION PROCESS

Selected submissions will be invited for in-person interview to present their analysis

WHAT WE LOOK FOR

- Finds non-obvious patterns in the data without being told what to look for
- Develops original analytical metrics beyond the minimum suggested
- Presents findings clearly to non-technical leadership
- Provides strategic recommendations tied to specific data findings

SUBMISSION DEADLINE: June 20, 2026
